Food Contaminants Systems

A Food Contaminant is any substance not intentionally added to food, showing up as a result of the production process or as a result of environmental contamination. The Decernis Food Contaminants Regulatory Systems contain the following topics:

- Dioxins and PCBs
- Guidance Documents
- Heavy Metals, Mycotoxins, Filth
- Hormonal Substances, Veterinary Drug Residue
- Microbiological Contaminants, Marine Biotoxins
- Methods of Analysis
- Pesticide Residues, Nitrates and Nitrites

gComply Regulatory Reference Database

gComply provides global knowledge and a regulatory library to determine the compliance status of your products.

gComply is a powerful web-based regulatory reference database providing access to over 100,000 regulations across more than 200 countries, allowing you to scan applicable requirements relevant to your business or products.

gComply Plus Compliance Management

gComply Plus is an enterprise-level system providing your business intelligent and integrated "Compliance Management" solutions to manage a component or a recipe.
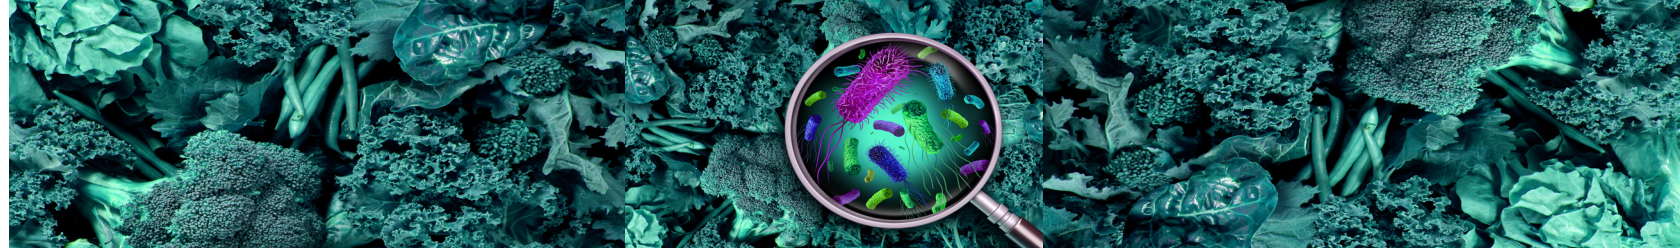

gComply Plus is a logic-based solution that links to Decernis' regulatory library to provide the source document supporting any conclusion. It simplifies complex global regulations, providing you with an effective and automated way to manage and control the compliance of your products.
