

Praedixi

Our Horizon Scanning system is now available in a new, sophisticated, easy-to-use version!

Intelligence gathering solution and early warning system

From draft requirements to dynamic developments in the marketplace to change management, more challenges than ever before exist for manufacturers and processors. With Decernis' patented "Horizon Scanning" technology, your business can proactively monitor regulatory changes, market trends and emerging issues that could affect your compliance, product developments and speed to market.

Praedixi is an intelligence-gathering solution using big data analytics. Our system provides insights through automatically monitoring and tracking of global events and regulations from thousands of selected sources.

Features

Praedixi provides emerging issues insights in a real-time solution for daily and global monitoring including:

- Easy setup and use
- Customizable newsletters
- Summary of results translated in 40 languages
- Monitors market developments, scientific opinions, trends and hot topics
- Draft and final regulatory notifications
- Product recalls and warning announcements

The sources of information for Praedixi include our expert editorial team, direct feeds of information from our governmental partners, official media sources, and automation. Our patented technology scans over 1,200 pages per minute, 2.5 million pages per day, across 40 languages and over 200 countries, and summarizes over 2,500 regulatory and
